Unlock the secret code of cats for a deeper connection with the feline in your life. Why does my cat always want to sleep on my computer keyboard? How can I keep her from bullying the dog? This used to be her favorite food, but now she won't touch it! Why will she only drink from the bathroom faucet? Does she actually like me? If you've ever wondered, as she sits on your head at 4am, what on earth is going on beyond your cat's inscrutable gaze, this ebook has the answers. Drawing on extensive animal behavior psychology and the latest research, it reveals what's really behind those things cats do--whether they're amusing, irritating, or just downright bizarre. Cats may not telegraph their emotions (unlike the dogs they look down on), but they do show their feelings, often quite subtly, in the way they relate to you, other animals, and their home environment. With gorgeous and accurate illustrations across a range of breeds, this ebook helps you read and interpret your cat's body language and behaviors, so you'll know when she's confident and contented, and when she's telling you that something's not right. Advanced Catwatching features put the spotlight on key behaviors such as sofa scratching, while strategic Survival Guides offer five top tips for successfully managing challenges such as moving to a new house, or introducing a new cat into the family. *What's My Cat Thinking?* will deepen your understanding of your cat's needs and wants and strengthen the unique connection between you. So when she gives you that 4am wake-up call, at least you'll know why.

The book is arranged alphabetically under the part of the body used with Meaning, Action, Background and Locality and each gesture is illustrated with a line drawing. Dogs can smell electricity. Cats can heal bones by purring. Kittens can contact their mothers via a secret, ultra-sonic language. Dogs can understand a vocabulary of 200 human words. Every day, it seems, new scientific discoveries are fuelling the age old argument about which of man's two best friends really is the superior species. Augustus Brown fans the flames further with this collection of the weirdest, most wonderful and downright incredible of these truths about cats and dogs. Did you know, for instance, that dogs can see moving objects 900 yards away, and that cats can sense earthquakes coming? Or that dogs prefer Bach to Britney, while cats prefer drugs to chocolate? Fascinating, funny and provocative, his book may not settle the debate once and for all. But it is certain to set cat and dog lovers arguing like, well you know what...

Few people can appreciate the joy that being owned by a cat brings better than David St John Thomas — the latest in a long line of publishers and authors to pay homage to the very special cats who have entered their busy lives. This is a book for everyone who really cares about cats. Vividly written, sometimes serious, sometimes light-hearted, anyone who has fallen for a cat, however much against their better judgement, is bound to find it uplifting. While cat people are nice (Hitler couldn't stand them!), the real heroes in this book are naturally the cats themselves. A rich portfolio of feline characters — including the author's own cats — step off the page, or perhaps lie curled in seductive curves on it, so vividly that you can feel their fur and hear their purr! Rich in entertaining anecdotes and asides, *For the Love of a Cat* will enhance every cat owner's understanding of their feline friend and remind them again and again just how lucky they are to share their lives with this most fascinating of creatures.

Sharp-toothed and quick-footed, carnivorous mammals are primed for the hunt. Far from ruthless, however, carnivores\u0097hunters by nature and necessity\u0097are integral to maintaining ecological balance. While predatory behavior often seems grisly, many carnivores are actually omnivorous and many can even be domesticated. This striking volume journeys from secluded forest habitats to our own homes to survey the unique features and behaviors of various species of carnivore. Vivid color photographs accompany the text and provide a detailed look at these amazing creatures.
